<rant>

Prototyping

~~JavaScript.prototype~~

Why?

Demonstrate a concept

Test out ideas

“This is my vision”

Freitag, 10. Juni 2011

“Can it work?”

Freitag, 10. Juni 2011

Principles of Prototyping

First try will be wrong

Make it work

Make a sketch

Iterate

Treat everything as throw-away

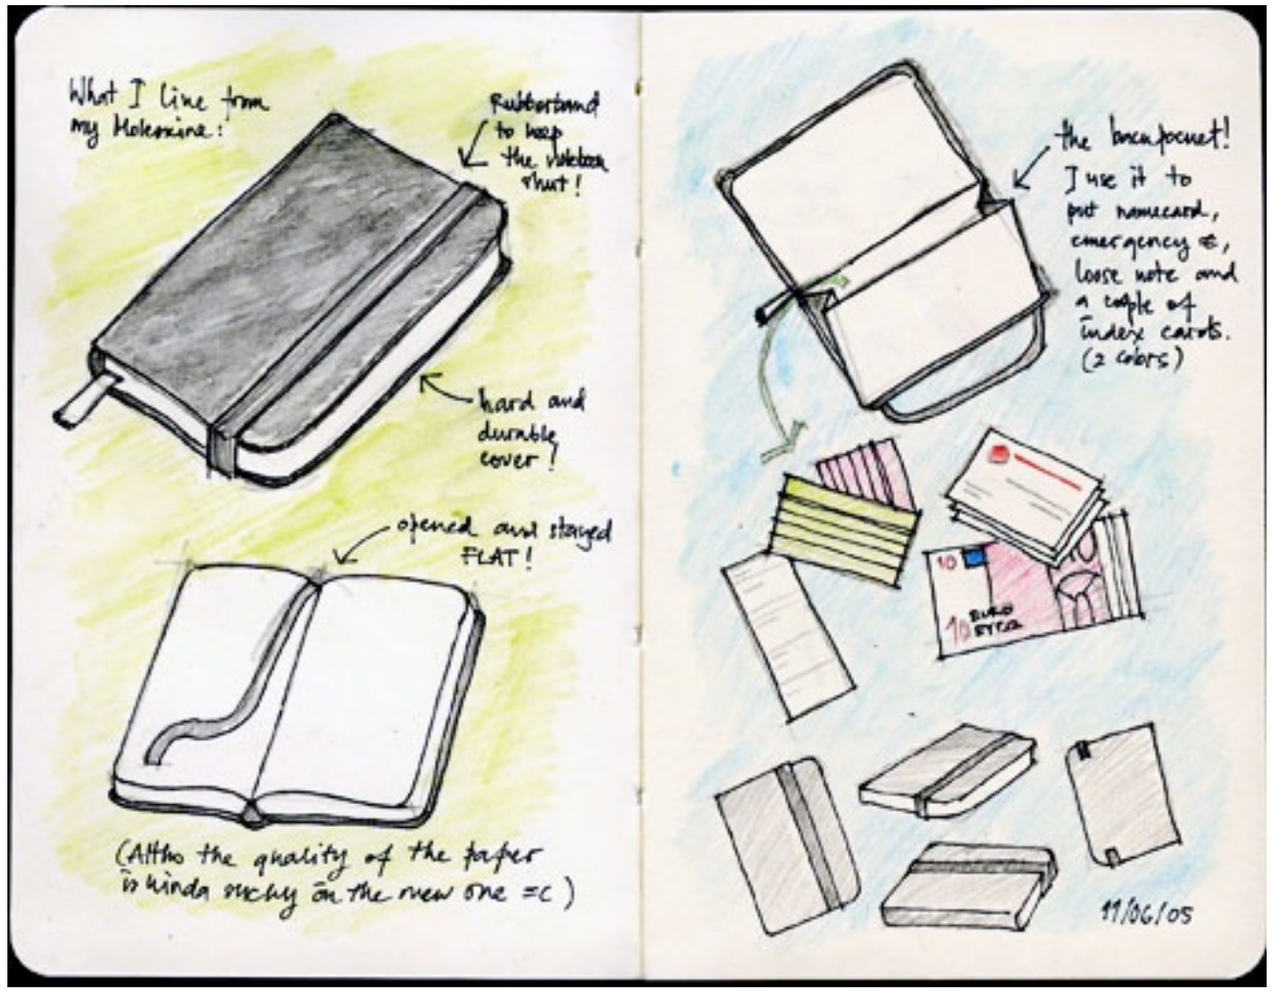
Borrow liberally

Tell a story

Throw everything away

Seriously:

```
rm -rf
```



What I like from my Moleskine:
Rubberband to keep the notebook shut!
hard and durable cover!
opened and stayed FLAT!
(Altho the quality of the paper is kinda sucky on the new one =C)
the bonus pocket! I use it to put namecard, emergency €, loose note and a couple of index cards. (2 colors)
10
10 EURO ETICA
